

# Cooperative ITS: From research to implementation – Relevance of standardization

6<sup>th</sup> ETSI ITS Workshop, Berlin, 12<sup>th</sup> February 2014

**Emilio Dávila**  
Innovation Unit  
European Commission  
Directorate General CONNECT

- ❖ *C-ITS within EU policy*
- ❖ *The need of standards*
- ❖ *EC support to standardisation*
- ❖ *How to achieve it*
- ❖ *International cooperation*
- ❖ *Conclusions*

## Roadmap to a Single European Transport Area

Towards a competitive and resource efficient transport system

- **To meet the challenges**, transport has to:
  - Use less energy
  - Use cleaner energy
  - Exploit efficiently a multimodal, integrated and 'intelligent' network
- Curbing mobility is not an option
- **By 2050 reduce emissions by 60%**, and 20% by 2020 (2008 level)
- **By 2050 move close to zero fatalities** in road transport, halving road casualties by 2020

- **Action Plan** for the Deployment of Intelligent Transport Systems (ITS) in Europe (Dec 2008)
- **Directive 2010/40/EU**: Framework for the Coordinated and Effective Deployment and Use of Intelligent Transport Systems
- **Cars 2020 and Cars21**
- The overall aim of the **Digital Agenda for Europe (DAE)** is to deliver sustainable economic and social benefits from a digital single market based on
  - fast and ultra fast internet and
  - interoperable applications

## C-ITS and DAE: "Every Car Digital, Every Car Connected"

- ✓ *Connected vehicles*
- ✓ *Internet of Things / Internet of Vehicles*
- ✓ *Big Data*

## Why do we need ITS standards?

- Enables **interoperability** of systems/services
- **Encourages innovation**, fosters enterprise and opens up new markets for suppliers
- **Creates trust and confidence** in products and services
- **Expands the market**, brings down costs and increases competition
- Helps to **prevent duplication of effort**
- Supports greater **confidence in procurement**
- **Interchangeability** of system component suppliers

## Instruments:

- Setting of the priorities : *ITS Directive legal Framework*
- Research Framework program/ H2020/ CIP
- EC Mandates for standardisation

## Groups:

- ITS Committee; ITS Advisory group
- ITS Standardisation Coordination Group (ITS-CG)
- iMobility Forum

## Funding of standardisation activities:

- ***ICT Standardisation Work Programme – Now Rolling Plan***
  - Specialist Task Forces on EETS
  - Specialist Task Forces on coop. systems
  - Specialist Task Forces on eCall
- ***Results from EU funded RTF projects/FOTs/Pilots***

## How to achieve it: Cooperation

- ✓ *Active and fair involvement of all the relevant stakeholders*
- ✓ *Support from RTD projects, validation and fine-tuning through field operational tests*
- ✓ *Cooperation among the different standardisation organisations and groups*
- ✓ *International cooperation*

## Global harmonisation of standards for Cooperative Systems

- **Memorandum of Cooperation** agreed between ETSI and U.S. DoT RITA
- **Harmonization Action Plan** process for finalising internationally harmonized standards
- **Harmonization Principles** suggest policies to be followed in the harmonization
- **Harmonization Task Groups (HTGs):**
  - HTG1: Management and security (complete)*
  - HTG2: Vehicle Safety Message (complete)*
  - HTG3: 5.9GHz protocol harmonization (complete)*
  - HTG4: Roadside messages (under way)*
  - HTG5: Intersection messages (under way)*
  - HTG6: Security Policy (started Jan 2014)*
- HTG reports issued and being applied by SDOs. Available on EU/US official sites:
  - [http://www.its.dot.gov/connected\\_vehicle/international\\_research.htm](http://www.its.dot.gov/connected_vehicle/international_research.htm)
  - <http://ec.europa.eu/digital-agenda/en/news/progress-and-findings-harmonisation-eu-us-security-and-communications-standards-field>
- MoC with Japan (MLIT)

### Benefits:

- ✓ reducing development costs
- ✓ getting to global markets
- ✓ avoiding duplication of efforts
- ✓ generating economies of scale

# Conclusions

- ❖ C- ITS have the potential to contribute tackling the mobility challenges in Europe and worldwide
- ❖ Standards are needed for wide take-up of ITS
- ❖ Stakeholders and SDOs cooperation is paramount
- ❖ Importance of global harmonisation
- ❖ Release 1 important milestone. In the right track towards deployment.

**Thank you for your  
attention**
